Prehospital Do Not Resuscitate (DNR) Form

Purpose

The Prehospital Do Not Resuscitate (DNR) Form has been developed by the California Emergency Medical Services Authority, in concert with the California Medical Association and emergency medical services (EMS) providers, for the purpose of instructing EMS personnel to forgo resuscitation attempts in the event of a patient’s cardiopulmonary arrest. Resuscitative measures to be withheld include chest compression, assisted ventilation, endotracheal intubation, defibrillation, and cardiotonic drugs. The form does not affect the provision of other emergency medical care, including palliative treatment for pain, dyspnea, major hemorrhage, or other medical conditions.

Applicability

This form was designed for use in prehospital settings – i.e., in a patient’s home, in a long-term care facility, during transport to or from a health care facility, and in other locations outside acute care hospitals. However, hospitals are encouraged to honor the form when a patient is transported to an emergency room. California law protects any health care provider (including emergency response personnel) who honors a properly completed Prehospital Do Not Resuscitate Form (or an approved wrist or neck medallion) from criminal prosecution, civil liability, discipline for unprofessional conduct, administrative sanction, or any other sanction, if the provider believes in good faith that the action or decision is consistent with the law and the provider has no knowledge that the action or decision would be inconsistent with a health care decision that the individual signing the request would have made on his or her own behalf under like circumstances. This form does not replace other DNR orders that may be required pursuant to a health care facility’s own policies and procedures governing resuscitation attempts by facility personnel. Patients should be advised that their prehospital DNR instruction may not be honored in other states or jurisdictions.

Instructions

The Prehospital Do Not Resuscitate (DNR) Form must be signed by the patient or by an appropriate surrogate decisionmaker if the patient is unable to make or communicate informed health care decisions. The surrogate should be the patient’s legal representative (e.g., a health care agent, a court-appointed conservator, a spouse or other family member) if one exists. The patient’s physician must also sign the form, affirming that the patient/surrogate has given informed consent to the DNR instruction.

The first copy of the form should be retained by the patient. The completed form (or the approved wrist or neck medallion – see below) must be readily available to EMS personnel in order for the DNR instruction to be honored. Resuscitation attempts may be initiated until the form (or medallion) is presented and the identity of the patient is confirmed.

The second copy of the form should be retained by the physician and made part of the patient’s permanent medical record.

The third copy of the form may be used by the patient to order an optional wrist or neck medallion inscribed with the words “DO NOT RESUSCITATE-EMS.” The Medic Alert Foundation (1-888-755-1448, 2323 Colorado Avenue, Turlock, CA 95381) is an EMS Authority-approved supplier of medallions, which will be issued only upon receipt of a properly completed Prehospital Do Not Resuscitate (DNR) Form (together with an enrollment form and the appropriate fee). Although optional, use of a wrist or neck medallion facilitates prompt identification of a patient, avoids the problem of lost or misplaced forms, and is strongly encouraged.

Revocation

If a decision is made to revoke the DNR instruction, the patient’s physician should be notified immediately and all copies of the form should be destroyed, including any copies on file with the Medic Alert Foundation or other EMS Authority-approved supplier. Medallions and associated wallet cards should also be destroyed or returned to the supplier.

Questions about implementation of the Prehospital Do Not Resuscitate (DNR) form should be directed to the local EMS agency.
I, ________________________________, request limited emergency care as herein described.

(print patient’s name)

I understand DNR means that if my heart stops beating or if I stop breathing, no medical procedure to restart breathing or heart functioning will be instituted.

I understand this decision will not prevent me from obtaining other emergency medical care by prehospital emergency medical care personnel and/or medical care directed by a physician prior to my death.

I understand that I may revoke this directive at any time by destroying this form and removing any “DNR” medallions.

I give permission for this information to be given to the prehospital emergency care personnel, doctors, nurses or other health personnel as necessary to implement this directive.

I hereby agree to the “Do Not Resuscitate” (DNR) order.

Surrogate’s Relationship to Patient ___________________________

By signing this form, the surrogate acknowledges that this request to forgo resuscitative measures is consistent with the known desires of, and with the best interest of, the individual who is the subject of this form.

I affirm that this patient/surrogate is making an informed decision and that this directive is the expressed wish of the patient/surrogate. A copy of this form is in the patient’s permanent medical record.

In the event of cardiac or respiratory arrest, no chest compressions, assisted ventilations, intubation, defibrillation, or cardiotonic medications are to be initiated.
