BACKGROUND

4.0 Uniformed fire and rescue personnel serve in one of the most hazardous of all occupations. They frequently are exposed to proven health hazards. 4.1 DFRS is concerned for the health of all of its employees. The non-use of tobacco products is in each employee’s best interest.

4.2 DFRS believes that abstention from the use of tobacco products accomplishes the following:

   a. A reduction in health hazards, because personnel will only be exposed to hazardous conditions directly related to fire and rescue work, which will result in a healthier, more productive workforce.

   b. A reduction in health hazards experienced by non-tobacco users.

   c. Delivery of higher quality service to the public because of improved physical fitness, endurance, and health.

   d. Safer job performance by employees due to improved physical condition.

   e. A cleaner and more pleasant work environment in fire and rescue work sites.
